Area Management

Responsible for the parks and green space service and asset in a given area of the city – providing the landlord function and accountability on behalf of the council and providing consent for service change.

Responsible for the effective management and development of grounds maintenance, waste management and health & safety for the parks service.

Deliver community corporate expectations in terms of parks grounds maintenance and parks asset management.

Asset Management

Responsible for condition inspection of infrastructure, buildings and play equipment – surveying facilities as necessary and organising major repairs.

Sets strategic direction for parks facilities management in line with policy and corporate priorities.

Responsible for day to day service delivery of allotments and tree maintenance (non planning-related).

Acts as custodian and manager of map-based data and service-related databases.

Programme Delivery

Overall responsibility for Parks and Neighbourhood investment and repair programme delivery.

Responsible for project delivery - partnership working with Neighbourhood Officers, Parks stakeholders and Charitable Trusts.

Responsible for funding, coordination and delivery of ParkWorks projects.

Parks Development

To lead on developing, embedding and supporting delivery of a flexible, iterative, strategic plan for the Parks and Green Spaces service, aligning corporate and community priorities and facilitating change that is progressive and affordable.

Lead on strategy and support delivery of programmes to increase Parks and Green Spaces revenue income, reduce costs through efficiency, and work as a key member of the Parks and Green Spaces Management team to ensure that all strategy is collectively owned and delivered across the management team and through all staff teams.
