Description of your Group

Hi there, we set up this group recently at the beginning of 2021 in appreciation of our green spaces that have been so beneficial for everyone through these difficult times.

We're looking at opportunities to enhance our local green spaces so that they can be used by all for improved physical and mental wellbeing. We're currently putting ideas together to include planting regimes, wildflowers, and improving wild spaces, as well as investigating longer term options of a community garden, urban forest and play area as we have many families that have moved in to the area over the last decade and no spaces within a 20 minute walking distance to play.

If you're interested in getting involved please do contact me by email. We do get some great wildlife appearing for such an urban area (deer, owls, woodpeckers, ducks) and we want to ensure the green space is not just kept but improved for future generations.
